

Falcon → DevODS interfaces.

Study --> 9 AM PST
Study Country --> 12 PM PST

- Any changes done at study level before 9 AM PST will be available in DevODS by 10:30 PM PST
- Any changes done at Study Country level 12 PM PST will be available in DevODS by 10:30 PM PST
- Any changes done in Falcon post the above schedules will only be picked up in the next day evening load.

RISK?: New study with country level data is entered into FALCON after Study cutoff but before Study Country cutoff – what is the impact to the ETL and DevODS?

Data entered into FALCON Tuesday after noon Pacific is not available to me in the Portfolio Feasibility Report until I get to work on Thursday
